

Error Fixing Log

Part2_1 1st Error:

Error: expected ':'

Fix: Added the missing colon at the end of the statement.

Part2_1 2nd Error:

Error: Traceback (most recent call last):

File "/home/onel/git/COIS1400/Lab3/File1Lab2ToFix.py", line 14, in <module>

if score >= A_score:

TypeError: '>=' not supported between instances of 'str' and 'int'

Fix: Cast the input to an integer using `score = int(input('Enter your test score: '))`.

Part2_2 1st Error:

Error: invalid syntax

Fix: Corrected the syntax by removing ':'

Part2_2 2nd Error:

Error: expected ':'

Fix: Added the missing colon at the end of the statement.

Part2_3 3rd Error:

Error: Traceback (most recent call last):

File "/home/onel/git/COIS1400/Lab3/File2Lab2ToFix.py", line 23, in <module>

gross_pay = hours * payRate

NameError: name 'payRate' is not defined. Did you mean: 'pay_rate'?

Fix: Corrected the variable name to `pay_rate` to match its definition.
